

Null Vector Alfa - Aluminium grey

DESIGN:

Carlotta de Bevilacqua , Laura Pessoni

MATERIAL:

Aluminium, methacrylate

BESCHREIBUNG:

Null Vector displays a full combination of optical and mechanical performance. The aluminium body is both a structural and an optical component for light emission control. The whole structure is generated from an escalating growth of an individual punching and cutting mould, designed in the two versions alfa and beta. This matrix is characterized by a punch pattern with three functions - luminous, perceptive, and mechanical. While, on one hand, it is the result of a well-calculated study of light emission in space, translated into a graphic element supporting perception, on the other it derives from surpassing the limits of the material's processing technology. The optical system with an energy-saving light source with E14 connection also includes a texturized glazed diffuser, which ensures uniform lighting. The multi-faceted punched structure generates a magic lighting effect evoking the product's simplicity and lightweight in all the available finishes.

Produktname: Null Vector Alfa - Aluminium grey
 Artikelnummer: 0940080A
 Farbe: Aluminium grey
 Material: Aluminium, methacrylate
 Serie: Design

DIMENSION

Länge: cm 13.7
 Höhe: cm 30
 Tiefe: cm 13.7
 Max Höhe von der Decke: cm 114
 Glühdrahttest: 750°C

OHNE LEUCHTMITTEL

LED retrofit Kategorie: LED
 Watt: 6W
 Sockel: E14
 Farbtemperatur(K): 3000K
 Baureihe: A

LUMINAIR

Watt: 6W
 Spannung (V): 230V
 Lichtstrom(lm): 390lm
 CCT: 3000K
 Efficacy: 55,7lm/W

Null Vector Alfa - Red

DESIGN:

Carlotta de Bevilacqua , Laura Pessoni

MATERIAL:

Aluminium, methacrylate

BESCHREIBUNG:

Null Vector conveys full synthesis between optical and mechanical performance. The whole frame is generated from the progressive expansion of an individual perforating and shearing mould. This matrix has a perforated pattern that performs three functions: luminous, perceptive, and mechanical. While on one hand it originates from a carefully studied calculation of light emission in space, translated into a graphic element that supports the experienced perception, on the other it is a result of surpassing the limits posed by the material processing technology. From the matrix to the individual element that, disassembled or reassembled in turn, generates paradoxically countless systems, yet simple and easy to understand. The low-voltage LED optical system, also with progressive powers and flows, forms a solid block with the body by means of three 120° transparent pins that allow free light flow and grow gradually in size according to the appliance's dimension. The multi-faceted frame generates a magic light effect evoking the product's simplicity and lightness. On request, greater light diffusion and homogeneity can be obtained by means of a glazed diffuser.
